PROFILE

Third-year student in Foreign Trade University's High-Quality Program in Banking and International Finance with strong interest in quantitative research and data analysis. Experienced in Stata-based panel data analysis, data cleaning, and academic report writing through coursework and research projects. Comfortable reading English academic literature and interpreting empirical findings.

EDUCATION

Foreign Trade University 2023 - 2027

High-Quality Program in Banking and International Finance

GPA: 3.57/4.0

ACADEMIC PROJECTS

Relationship between Corporate Governance and Firm Profitability

Team Research Project | Stata | Panel Data Econometrics

- Led the quantitative analysis for a team research project on how corporate governance affects firm profitability among HNX-listed firms from 2010 to 2024.
- Cleaned and structured panel data in Stata, including type conversion, variable renaming, log transformation, winsorization, missing-value handling, and construction of firm-level control variables.
- Conducted model diagnostics and specification tests using VIF, Hausman, heteroskedasticity, autocorrelation, and time fixed-effects tests; estimated Fixed Effects regressions with clustered robust standard errors.
- Interpreted coefficients and significance levels, exported regression tables, and wrote the research results section for the final report.

Impact of News Sentiment on Stock Returns: Evidence from VN30

Team Research Project | Python, Jupyter Notebook | Panel Data Analysis

- Developed a Python workflow in Jupyter Notebook to collect financial news, retrieve VN30 market data, and construct a panel dataset for analysis.
- Processed and merged firm-level sentiment, macro news, stock prices, and trading volume data for econometric modeling.
- Applied sentiment scoring and estimated panel models in Python, including Pooled OLS, Fixed Effects, and Random Effects with diagnostic tests.

TECHNOCAL SKILLS

- **Data Analysis:** Stata, Python, SQL, Excel, Power BI, Tableau
- **Econometrics:** Panel data analysis, Fixed Effects, Random Effects, Hausman test, heteroskedasticity and autocorrelation diagnostics, cluster-robust standard errors
- **Data Handling:** Data cleaning, variable construction, winsorization, outlier treatment, descriptive statistics, regression table export
- **Research Skills:** Quantitative research, results interpretation, academic report writing, literature review

HONORS, AWARDS & CERTIFICATIONS

Awards

- City-Level Five-Good Student Award 2025
- Consolation Prize, Vietnam Student Informatics Olympiad (Specialized Division) 2025
- Second Prize, Vietnam Student Informatics Olympiad (Non-specialized Division) 2024

Certifications

IELTS 7.0 2022
