EDUCATION

Foreign Trade University

2023 - 2027

High-Quality Program in Banking and International Finance · GPA: 3.6/4.0

- **Related Coursework:** Database (10.0), Financial Econometrics (9.0), Advanced Mathematics (9.3), Probability Theory and Mathematical Statistics (9.5).

EXPERIENCE

MB Bank (Ngan hang TMCP Quan doi)

July 2026 - Present

Personal Banking Intern

- **Advised** individual clients on core retail banking products (savings, transaction accounts, credit, MB App/QR payment) to address their personal finance needs and support account-opening decisions, **resulting in** accurate KYC documentation and smooth onboarding for **every client handled**.
- **Assisted** with customer data entry and administrative processing to keep client records and transaction documentation audit-ready, **gaining** hands-on exposure to real banking data structures directly relevant to AI-for-finance research.

ACADEMIC & RESEARCH PROJECTS

Relationship between Corporate Governance and Firm Profitability

2026

Stata, Panel Data Econometrics

- Led the quantitative analysis on how corporate governance affects firm profitability among **21 HNX-listed firms (248 firm-year observations, 2010-2024)**; cleaned and structured panel data in Stata.
- Conducted model diagnostics and estimated Fixed Effects regressions with clustered robust standard errors, explaining up to **53.7%** of within-firm profitability variation and finding that **higher leverage was the strongest driver reducing ROE**.

Impact of News Sentiment on Stock Returns: Evidence from VN30

2025

Python, Jupyter Notebook, NLP

- Built a Python pipeline to collect financial news and retrieve VN30 market data, constructing a panel dataset of **11,010 firm-day observations** (30 firms, Jan 2023-Jun 2024) that merges firm-level sentiment, macro news, stock prices, and trading volume.
- Applied **NLP-based sentiment scoring** and estimated panel regression models, finding that **positive firm-level sentiment significantly increased same-day stock returns by 0.23 points**, explaining up to **37.7%** of return variation alongside market-wide movements.

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, SQL, Stata.
- **Computer Knowledge:** Machine Learning, Data Science, NLP, System Design, Data Analytics.
- **Data Handling:** Data cleaning, variable construction, winsorization, outlier treatment, summary statistics.
- **Software & Tools:** Excel, Power BI, Tableau.
- **Foreign Languages:** English - IELTS 7.0; Chinese - HSK 3.

HONORS & AWARDS

- City-Level Five-Merit Student Award, 2025.
- Second Prize, Non-IT Speciality Division - The 32nd Vietnam Olympic in Informatics (OLP '23).
- Consolation Prize, IT Speciality Division - The 34rd Vietnam Olympic in Informatics (OLP '25).
- Third Prize, City-Level Excellent Student in Informatics, 2022.
- Bronze Medal, Northern Coastal and Delta Region Excellent Student Competition in Informatics, 2022.
